Limber Martinez

Junior Developer

Hello, I'm Limber Martínez, an enthusiastic web developer with a focus on frontend technologies and a growing interest in the backend. Through self-taught learning and specializations, I have acquired a solid foundation in web development, with a clear goal: to start my career in the IT sector as a frontend developer, where I can contribute my knowledge and continue learning in a challenging environment.

Python LangChain & LLMs
Specialization in Python focused on LangChain and LLMs

Languages

Spanish: Native

German: B2

English: A2

Learning

April 2023 - October 2023
Oracle One, Backend Developer
Java Junior Developer

This intensive program immersed me in the world of backend development, where I gained fundamental knowledge in Java and Spring Boot. Through practical and collaborative projects, I developed robust applications, learning to integrate databases and implement complex business logics.

October 2022 - June 2023
UTN Buenos Aires, Full-Stack Developer
Full Stack Mern Junior Developer

During this period, I specialized in frontend development technologies such as React and Angular, building dynamic and responsive user interfaces. Simultaneously, I complemented my training with backend development knowledge using NodeJS.

January 2022 - January 2023
ILS Institut für Lernsysteme, Web Developer
Web Developer Junior

My journey in web development began with this course, where I learned the pillars of modern web design: HTML5, CSS3, and JavaScript. This laid the foundation for my understanding of frontend technologies, allowing me to create websites from scratch with responsive design practices.

Skills

- React.js
- AngularJS
- Astrojs
- Spring Boot
- Git & Github
- Mongo DB
- MySQL
- Agile Methodology
- Node.js
